## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. *Claims 1, 2, and 5-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Roberts et al. (United States Patent 4,637,064), hereinafter referenced as Roberts.*

Regarding **claim 1**, Roberts discloses a local area network equalization system and method. In addition, Roberts discloses a process for configuring a transceiver for providing data communications via residential wiring, the method comprising the steps of: transmitting a pulse signal having a selected amplitude by a transmit section of the transceiver, receiving the pulse signal by an input circuit in a receiver section of the transceiver to produce a receive signal representing the pulse signal, and adjusting gain of the input circuit so as to produce the receive signal at a predetermined level, as disclosed at column 5, line 11 through column 6, line 52 and exhibited in figure 3.

Regarding **claim 2**, Roberts discloses everything claimed as applied above (see claim 1), in addition Roberts discloses wherein the gain of the input circuit is adjusted to a fixed level during initialization of the transceiver, as disclosed at column 5, line 11 through column 7, line 5 and exhibited in figure 3.

Regarding **claim 5**, Roberts discloses everything claimed as applied above (see claim 1), in addition Roberts discloses wherein the step of adjusting gain comprises

comparing amplitude of the receive signal with a preset threshold, as disclosed at column 5, line 11 through column 7, line 5 and exhibited in figure 3.

Regarding **claim 6**, Roberts discloses everything claimed as applied above (see claim 5), in addition Roberts discloses wherein the gain is reduced if the amplitude of the receive signal exceeds the threshold level, as disclosed at column 5, line 11 through column 7, line 5 and exhibited in figure 3.

Regarding **claim 7**, Roberts discloses everything claimed as applied above (see claim 6), in addition Roberts discloses wherein the gain is increased if the amplitude of the receive signal is less than the threshold level, as disclosed at column 5, line 11 through column 7, line 5 and exhibited in figure 3.

Regarding claims 8-11, they are interpreted and thus rejected for the reasons set forth above in the rejection of claims 1, 2, and 5-7.

***Allowable Subject Matter***

2. ***Claims 3, 4 and 12-17*** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jefferey F Harold whose telephone number is 703-306-5836. The examiner can normally be reached on Monday - Friday 9 am - 5:30 pm.
